YAMUNA KURAI

Quality Engineer

kuraiyamuna04.github.io/portfolio/

<https://github.com/kuraiyamuna04>

SUMMARY

Dedicated Quality Engineer with strong experience in manual testing and basic understanding of automation concepts. Skilled in functional, regression, UAT, and API testing with the ability to design and execute effective test cases. Adept at identifying defects, collaborating with cross-functional teams, and ensuring high-quality software delivery. Knowledgeable in Selenium and TestNG at a beginner level and focused on expanding automation capabilities.

SKILLS

- Manual Testing, Functional, Regression, UAT, E2E, Smoke, Sanity, Accessibility Testing
- API Testing using Postman
- Test Case Design, Test Execution, Defect Reporting
- Tools: Jira, Confluence, Zephyr, Microsoft Office, Git
- Programming: Python, OOPs, HTML, CSS, Bootstrap, Django
- Basic Automation Knowledge: Selenium WebDriver, TestNG/JUnit
- Database Testing: MySQL, SQL Queries
- Methodologies: Agile, Waterfall
- Soft Skills: Problem Solving, Communication, Time Management, Leadership

EXPERIENCE

Quality Engineer - Accenture (June 2024 - Current)

As a Quality Engineer at Accenture, I perform manual testing and have beginner-level experience with automation tools to ensure high-quality software delivery.

My key contributions include:

Manual Testing:

- Requirement Analysis: Understanding project scope through business and functional specifications.
- Test Design & Execution: Creating comprehensive test cases and performing smoke, functional, regression, and UAT testing.
- Defect Reporting: Documenting and tracking issues using tools like JIRA.
- Collaboration: Working closely with stakeholders to resolve issues and clarify requirements.

Automation Testing (Basic Exposure)

- Gaining hands-on experience with Selenium WebDriver and TestNG to understand automation workflows.
- Writing simple automation scripts and learning the fundamentals of frameworks such as the Page Object Model (POM).
- Assisting in basic automation tasks, including script maintenance and execution, to support the automation team.

This combination of manual and automated testing expertise allows me to deliver high-quality solutions while optimizing testing workflows.

Python Developer Intern - Surepass Technology(Feb 2023-July 2023)

- Worked on projects involving web scraping and API integration using Python.
- Extracted, processed, and analyzed data from various online sources using Python libraries.
- Gained hands-on experience in data extraction, automation scripts, and basic API handling.
- Improved programming fundamentals by working with real-world datasets and code optimization tasks.
- Enhanced problem-solving skills by debugging scripts and ensuring smooth data workflow execution.
- Learned and applied best practices in Python development to build efficient and reliable solutions.
